1. ABSTRACT

The project is about website where students can download and upload the projects. It is generally seeming like the Git hub platform where we can upload or download any type of projects and resources regarding any topic. Similarly, this website is developed for our SRKR students where they can upload and download the projects based upon the area of interest they select and along with that students can choose mentors for their project guidance. Present this website limited to only CSE department. Later it can be used by all others students in the college.
